

SHREYA MERIN MATHEW

Ernakulam, Kerala • shreyamerinmathew13@gmail.com • +91 8848375176 • [LinkedIn](#) • [Github](#)

SUMMARY

Aspiring Data Science professional skilled in Python, ML, and SQL, with strong analytical and problem-solving abilities. Dedicated to building scalable, intelligent systems that bridge data and decision-making.

EDUCATION

Viswajyothi College of Engineering and Technology

Bachelor of Technology

Major in AI and Data Science; Minor in ECE; Honours in Computational Biology

CGPA: 9.46/10

Muvattupuzha, Kerala

OCT 2022-Present

EXPERIENCE

AI Intern – DRKA INTELLIGENCE

Project: TrustHire AI & CDA Leasing Bot

- Built TrustHire AI, a full-stack hiring verification platform (Next.js/TypeScript/Tailwind, FastAPI/Python, Supabase) where candidates connect a GitHub repo via secure OAuth + scoped GitHub App access, enabling repo ingestion and code analysis with tree-sitter/NetworkX.
- Developed candidate, recruiter, and advisor portals for TrustHire AI with real applicant pipelines and evidence-based candidate tiering, replacing all placeholder/mock data with verifiable evidence.
- Engineered CDA Leasing Bot V2(Australian Client), an unattended multi-account lead-generation engine (Python, Playwright, Claude API, Supabase/Postgres) processing several hundred leads/week with inbound and outbound sourcing.
- Integrated CDA Leasing Bot V2 with HubSpot's REST API to sync leads, inspections, and room inventory (2,500+ records) and built a routing engine with human-in-the-loop safety guards for automated lead assignment.

AI Intern – Infosys Springboard

Project: RideWise – Bike-Sharing Demand Prediction

- Built ML regression models to forecast bike-sharing demand using 30,000+ rental records, real-time weather data, and city event information.
- Performed data cleaning, feature engineering, and exploratory analysis to identify key demand drivers and improve prediction performance.
- Trained and evaluated multiple regression models to achieve target accuracy, supporting data-driven fleet planning and demand management.

PROJECTS

NexHire- AI Driven Job and Resume Analysis

Python, SpaCy, Streamlit

- Built a resume parser using **Python**, **BERT**, and **SpaCy** with 95% accuracy
- Created a job scraper aggregating listings based on user preferences
- Generated personalized job fit scores using NLP and stored data in **SQLite3**

LexAssist- Intelligent Legal Query Platform

Python, BERT, NLP

- Building an AI system to interpret legal queries and provide relevant case-based recommendations.
- Creating NLP pipelines with Transformer models for semantic search and query understanding.
- Using Supabase for backend authentication, database operations, and model integration.

TECHNICAL SKILLS

- Languages:** Python, Java(Basic), SQL(Basic)
- Frameworks:** Scikit-learn, spaCy, Pandas, Matplotlib, Numpy
- Concepts:** ML, DBMS, OOPS,DSA,NLP

- **Tools:** GitHub, Microsoft Visual Studio Code, MySQL, Jupyter

ACTIVITIES AND LEADERSHIP

TINKERHUB CAMPUS COMMUNITY

VJCET

Women in Tech Campus Lead

Aug 2024– Aug 2025

- Organized 2 major hackathons with 50+ participants each, boosting women's participation by 50%
- Led tech workshops and mentoring sessions, increasing campus tech org membership by 30%
- Launched the OpenMic diversity initiative, improving retention of women in STEM by 35% through monthly talks and networking

GHCI 2024 SCHOLAR

- Selected as a GHCI Scholar for participation in India's largest Women in Tech conference.
- Gained exposure to industry leaders and cutting-edge research in AI and technology.

SAP HACK FEST 2025 – HUB LEVEL QUALIFIER

CERTIFICATIONS

- EY Financial Accounting Advisory Services (FAAS) Job Simulation- [Forage](#) April 2025
- Data Science Foundation Certification- Infosys September 2024
